EDUCATION

CMR Institute of Technology   Bengaluru,Karnataka
*B.E **Computer Science** GPA: **8.29***   *August-2019*

Sri Chaitanya Techno School   Visakhapatnam, Andhra Pradesh
*CBSE Class 12 PCM:**78.8***   *Apr 2017 - May 2018*

Saint Teresa School   Bhagalpur, Bihar-812005
*ICSE Class 10 Percentage: **83.5***   *April 2015 - May 2016*

TECHNICAL SKILLS

Languages : Java , C# , JavaScript, HTML/CSS, Sql.

Developer Tools : Visual Studio, Github, Unity , Postman, Blockchain.

Libraries and Frameworks : ReactJs, Spring Boot, Bootstrap, ASP .NET Core,AWS .

Databse : MySQL , Firebase.

Operating System : Windows

Methodology : OOAD , Agile , Security Software Development.

PROJECTS

Disney Plus Clone — Reactjs, **Redux.**, **Firebase.**

Developed a Disney Plus Clone using **React.js**, **Redux**, and **Firebase**.Implemented seamless user **auth-entication** through **Google** Account integration.Utilized Firebase as the **backend database** for storing and retrieving movie data for online streaming.Created a user-friendly interface for effortless movie brow -sing and streaming.Integrated Redux for efficient **state management,ensuring smooth interactions** and data flow. Showcased expertise in front-end development, including **HTML, CSS,** and **JavaScript**. Delivered a visually appealing and intuitive user interface.

Decentralized applications(dApps) for an efficient Voting System — Blockchain
Metamask Wallet, **Ganache**, **Truffle**,**ReactJs.**

Decentralized application (dApp) that interacts with the **Ethereum blockchain** using **smart contracts** and to **build** and **deploy** smart contracts using Truffle to compile and test locally, and then deploying them to the Ethereum network using Ganache.

Village Help Desk — ReactJs,**HTML/CSS**, **Javascript**, **ASP .NET Core**,**Postman**

full-stack web application built using **ReactJS and Material UI** for the front-end
ASP.NET Core for the back-end,also used **Postman** for **API's** testing,created **API's end-point**
followed **Agile methodology**,used **GIS** Integration

Internship

GlobalLogic India Private Limited   Bangalore, India.
Trainee Software Engineer   Febuary 2023 - June 2023

- **Responsibilities**:
    - Worked on developing a new feature for the company's internal project.
    - Working on **Back-End** and **UI** part for the web-based application.
    - Implementation ,fetching of **API's** and **GIS** Integration.
    - Creating Login,Registration and Authentication controllers, various Repository and their Interface, also Creating different DTOs for the usual Model Classes.
    - Working with Code First Approach as well as Databse First Approach.
- **Skills Gained**:
    - Language : **C#**, **JavaScript**.
    - Framework : **ASP .NET Core 6.0**, **NodeJS**, **ReactJS**.
    - Worked with **Docker** and **JenKins** for developing and software testing.

AWARDS & ACHIEVEMENTS

1. 24 Hours-TYL-**Hackathon Java/Python/C++** Secured **First** place Team -Debug Entity
2. Participated in **Flipkart Grid 4.0** Software Development Challenge.
3. Participated in **Namma Yatri** Open Mobility Challenge to solve **Mobility** Problem.
4. Attended E-Yantra Robotics(IIT-Bombay)seminar.
5. C# Intermediate:Classes,Interfaces and OOP.
6. Good Team player and Good Communication skills.
